

V. BALA PRASANNA NARASIMHAM

Andhra Pradesh, India | +91 8019243798 | balaprasannanarasimham.v@gmail.com

[LinkedIn](#) • [GitHub](#) • [Portfolio](#)

PROFESSIONAL PROFILE

Data Science student with practical experience in engineering AI-driven applications, automation workflows, and end-to-end data pipelines. Proven track record of developing intelligent platforms to address real-world challenges using machine learning, computer vision, and predictive analytics. Adept at translating complex data architectures into clear business insights and interactive visual solutions.

EDUCATION

B.Tech in Data Science

2023 – 2027

Andhra Loyola Institute of Engineering and Technology (ALIET), Vijayawada

TECHNICAL SKILLS

Programming Languages: Python, Java, C

Data & Analytics: SQL (Basic), R Programming, Data Modeling, Statistical Analysis

Data Visualization & BI: Microsoft Power BI, Interactive Dashboards

Web Technologies: HTML, CSS

Tools & Automation: Google APIs, n8n, MS Excel, PowerPoint

Core Competencies: Agile Problem Solving, Technical Leadership, Rapid Technology Adaptation

PROFESSIONAL EXPERIENCE

Data Analytics Intern

May 2026 – June 2026

Datavalley India Pvt. Ltd. (in collaboration with APSCHE)

- Selected for a rigorous, short-term data analytics and visualization program to solve industry-centric challenges.
- Transformed complex datasets into interactive Microsoft Power BI dashboards to drive key data-centric business intelligence solutions.
- Applied operational principles of data modeling, schema optimization, data cleansing, and dynamic visual reporting.

Cyber Security Intern

May 2025 – July 2025

Supraja Technologies

- Gained practical exposure to network security architectures, threat landscape evaluation, and cyber threat analysis.
- Assisted in identifying architectural vulnerabilities and modeling potential threat and attack patterns.
- Deployed foundational security practices to reinforce system security postures and enhance protection workflows.

TECHNICAL PROJECTS

AURA – Gamified Student Contribution Tracking Platform

- Developed a full-stack student performance application implementing role-based access control (RBAC) to securely track, validate, and audit multi-tier contributions.
- Designed and integrated an automated gamification engine utilizing real-time leaderboards, dynamic badge allocations, and engagement streaks to maximize user retention.
- Engineered analytics dashboards to parse historical performance metrics, enabling faculty to gain actionable insights into student engagement trends.

DataLeaf – Digital Carbon Footprint Analyzer

- Built an innovative sustainability platform that programmatically parses digital cloud storage usage (targeting Gmail and Google Drive) to calculate real-time digital carbon emissions.
- Architected an interactive analytics dashboard featuring a proprietary sustainability scoring algorithm and automated cleanup workflows to mitigate cloud overhead.

Plant Disease Identification System

- Developed an end-to-end computer vision system utilizing deep learning image classification to identify agricultural plant pathogens from visual inputs.
- Implemented an automated recommendation pipeline that matches detected anomalies against a treatments database to provide farmers with instantaneous remedies.

Food on Wheels

- Built a digital platform connecting local users with nearby street food vendors to expand small-business accessibility.
- Enhanced micro-vendor discoverability and market reach via localized, real-time geographic mapping.

Indoor Navigation System

- Designed a navigation system optimized for large, complex indoor layouts using specialized spatial routing algorithms.
- Assisted users in seamless indoor pathfinding by calculating optimal paths to specific points of interest.

PROFESSIONAL CERTIFICATIONS

- **SWAYAM NPTEL:** Human Computer Interaction (Consolidated Score: 94% | Elite Top Tier)
- **Google Skills / L4G:** Generative AI by Google Cloud (45-Hour Specialization, 22 Skill Badges covering Beginner, Advanced, and GAIL Pathways)
- **HP LIFE Foundation:** Data Science & Analytics (Core data practices, methodologies, and analytical tools)
- **Infosys Springboard:** Hands-On Data Visualization with Microsoft Power BI
- **Infosys Springboard:** Fundamentals of R Programming and Statistical Analysis
- **Infosys Springboard:** Introduction to Business Intelligence
- **Simplilearn SkillUP:** Introduction to Animation Fundamentals Course

TECHNICAL INTERESTS

Artificial Intelligence, Machine Learning, Data Science, Intelligent Automation Systems

LANGUAGES

English, Telugu
